What Does Therapy Care Do?

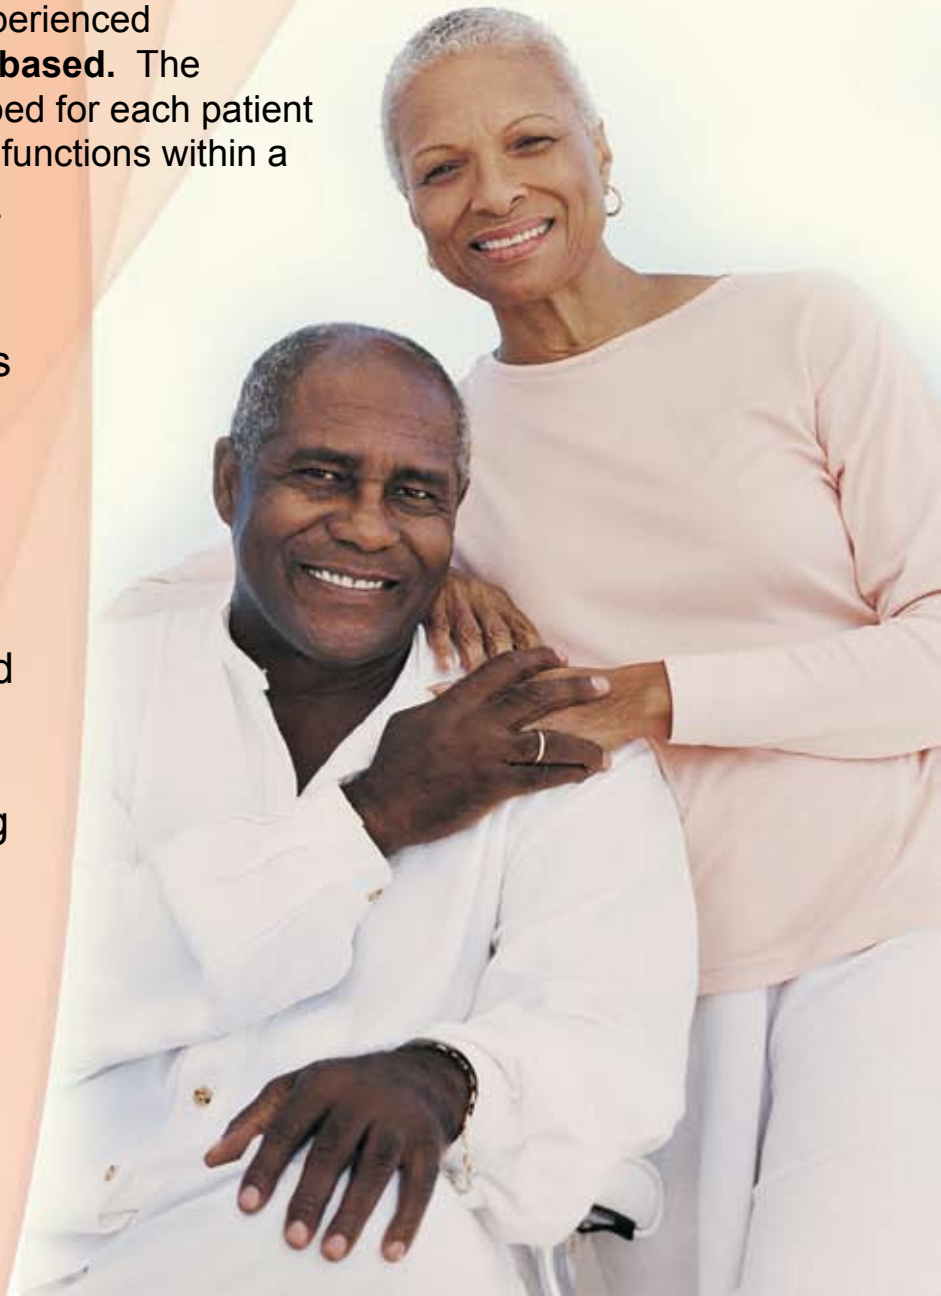

Therapy Care, Ltd. established in 1990 specializes in speech pathology services in all types of clinical and residential locations. Therapy Care's clinical team provides rehabilitation therapy in **long term skilled care facilities, acute and sub-acute facilities, clinics, assisted living facilities and home care locations.** We have access to highly qualified speech/language pathologists and the ability to provide our services in most states.

Our speech pathology services follow the clinical mandates of the American Speech-Language-Hearing Association. The standard of clinical care used by all Therapy Care clinicians is dictated by Medicare. Our clinicians far exceed the Medicare standard of care in all our service delivery models and documentation protocols.

All clinical diagnostic and therapy services delivered by our master level certified and experienced speech pathologists are **evidence-based.** The individualized Plan of Care developed for each patient is a **results oriented** program and functions within a multidisciplinary team environment.

Therapy Care, Ltd. utilizes a network of clinical supervisors to monitor and provide professional support and resources to optimize each patient's **results oriented therapy program.** Our therapy services are delivered objectively with documented measurable outcomes while allowing for empathetic caring and compassion for each patient.

Clinical Areas of Rehabilitation Therapy Services Consist of the Following:

- ◆ **Language Therapy** (Receptive and/or Expressive)
- ◆ **Aphasia** (from Stroke, Traumatic Brain Injury, Dementia, Alzheimer Disease, Neurological Conditions, etc.)
- ◆ **Dysphagia/Swallowing**
- ◆ **Feeding Training** (establishment of programs)
- ◆ **Voice Therapy** (due to Parkinsons, Neurological Conditions, etc.)
- ◆ **Augmentative-Alternative Communication Systems**
- ◆ **Family Caregiver and Staff Training**

A patient's clinical success is objectively proven by our thorough documentation system of measurable objectives and outcomes. Each patient's documentation clearly states this objective data and is shared in a timely manner with the patient's physician.

We use a Functional Patient-Centered Approach in Speech Therapy which consists of the following:

- ◆ **Speech Therapy** services created to meet the patient's needs of daily life.
- ◆ **Speech Therapy** dedicated to excellence in providing a comprehensive therapy program unique for each individual.
- ◆ **Speech Therapy** incorporating the patients needs to communicate to family and other people important to the patient.
- ◆ **Speech Therapy** services provided by the highest qualified and experienced speech/language pathologists.
- ◆ **Speech Therapy** adhering to all State, Federal and Local regulations.
- ◆ **Speech Therapy** practices strictly following the American Speech Language and Hearing Association's Best Practices and Code of Ethics.

Our Mission:

- ◆ **To Improve** the lives of our patients through the therapy services provided by our highly qualified clinicians.
- ◆ **To Support** our clinicians through specialized therapy placements and professional growth opportunities while providing therapists with a nurturing clinical support team.
- ◆ **To Partner** with organizations to meet their clinical needs within financial, time and federal law restrictions.
- ◆ **To Continue** to set the standard for state of the art clinical and ethical services in all venues serviced by our clinicians.

Our speech/language pathologists are **TEAM** players!

Together with the other clinical disciplines, our speech/language pathologists establish rehabilitation programs to meet the daily living needs and wishes of the patient. These programs function seamlessly with the clinical goals of the multidisciplinary team.

Each patient's individual needs and desires are incorporated into the patient's individual plan of treatment.

Addjusting every aspect of the patient's therapy program with physician directives is done on a continuous basis as the patient's skills are acquired and/or the health status varies.

Meeting the specialized needs of each patient is reflected in a comprehensive therapy program which is firmly rooted in current scientifically backed techniques and approaches.
